Africa Twin reaches new heights

In 2017, the Africa Twin broke the record for the highest altitude reached by a twin-cylinder motorcycle. After 5 days of acclimatisation, a team of 5 riders piloted the Africa Twin onto the slopes of the world's highest active volcano, the Nevado Ojos del Salado - located between Argentina and Chile. Reaching 5,965 metres above sea level, the international team completed its ascent within 24 hours with Africa Twin specially equipped with Termignoni exhaust, revised final sprockets, new Metzeler MC360TM tyres and a range of Honda genuine accessories. Their route took them - in temperatures as low as minus 5 degrees Celsius - through broken asphalt, gravel, mud, sand and finally stretches of ice pockets known as 'penitentes', underlining once again the Africa Twin's credentials as the best-performing off-road motorcycle in its class.

Tougher than the rest!

During the 2019 edition of the Gibraltar Race, Renato Zocchi steered the X-Adv to the Class 2 victory in this especially tough 7,000-km rally from Baltic Sea to Atlantic Ocean. The seasoned off-road rider not only won his class but also put himself as seventh overall in the event, beating out the competition of purpose-built dirt bikes and adventure tourers. While the X-Adv was specially prepared with extra wheel travel and ground clearance Zocchi kept the footboards and drove its DCT version on Gravel mode. Another proof that no matter where you want to go, the X-ADV is tougher than the rest to get you there!

Do you really need a left lever to enjoy riding?

The Dual Clutch Transmission made its worldwide debuts for motorbikes in 2010 with the Honda VFR 1200. Now entering its 3rd generation and downsized to suit mid-displacement bikes, the DCT is completely different from the belt-type transmissions used by most scooters: it is structurally a conventional 6-speed gear ratio transmission, yet electronically controlled when changing speeds. Keep the fun of a manual transmission; enjoy the comfort of an automatic one!
